## ***Part II DETAILED ACTION***

This office action is in response to applicant's amendment filed on March 7, 2005.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the feature of “an illumination means housed within said shaft” (claim 1) “the illumination means comprises and incandescent lamp” (claim 3) must be shown or the features canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 3-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regard to claims 1 and 7, the phrase “illumination means housed within said shaft” does not consist the body of the claimed invention. According to the specification, the illumination appears to be housed at upper end of the handle and extending directly to the shaft, but is not housed in the shaft as amended. Clarification is required.

Regard to claim 3, the phrase “an incandescent lamp located on the interior of said handle” does not consist with the body of the claimed invention as previously defined in claim 1 which, now, claims the illumination means housed within the shaft.

Regard to claim 5, the phrase “wherein said shaft holds and contains a battery assembly at said shaft lower end” does not deem consistent to the body of the claimed invention as previously defined. According to the specification, the battery assembly is contained on the handle section rather than at the shaft lower end.

Regard to claim 6, the features: the cavity, the series threads, a screw cap are not located on the shaft as now claimed, but rather on the handle section.

Art Unit: 3637

The claims are confusion of what are the structural limitations of the claimed invention. Appropriated correction is required.

***Allowable Subject Matter***

4. Claims 1 and 3-7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Response to Arguments***

5. Applicant's arguments, filed March 7, 2005, with respect to the rejections of claims 1-7 under 102/103 rejection have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, applicant's amendment necessitate the new grounds of rejection
